- Firebase

Projects

Result Management System

Tech: Angular, PrimeNG, Bootstrap, Material UI

- Developed a web application for teachers to manage student results (add, edit, delete).
- Enabled students to view their results easily by entering roll numbers or names.
- Designed a clean and responsive interface to enhance user experience.

E-Community (Shopping Website)

Tech: Angular, PrimeNG, Bootstrap, Material UI, FontAwesome

- Built a responsive e-commerce website for buying, selling, and reviewing products.
- Implemented smooth product search, mobile responsiveness, and user-friendly navigation.

Real-Time Chat Application

Tech: Angular, Tailwind CSS, Firebase

- Created a real-time chat app with secure user authentication.
- Focused on delivering fast messaging and a lightweight, modern UI.

Quiz App

Tech: Angular, PrimeNG, Bootstrap

- Designed a multiple-choice quiz platform with real-time scoring and feedback.
- Ensured clean UI/UX with responsive design for all devices.

Translator App

Tech: Angular, FontAwesome, RapidAPI

- Developed a multilingual translator app supporting real-time language conversion.
- Focused on fast response time and a user-friendly interface.

Random String Generator Tool

Tech: Angular, Bootstrap

- Built a lightweight tool for generating secure random strings for passwords and tokens.
- Designed with customization features and instant string generation.
